

Staeger Clear Packaging helping to prevent ocean plastic waste

Fully Recyclable British Green Shields made from Ocean Waste

As a supplier of face visors to the NHS we have now launched our Green Shields - a sustainable and more permanent solution - perfect for all sectors, as well as the general public.

Our Green Shield sets consist of a headband and ten recyclable inserts. Further inserts can be bought separately (see website). These are both skin-friendly and environmentally responsible as the inserts are made from flake

sourced under the Prevented Ocean Plastic initiative.

The initiative aims to reduce plastic pollution in our oceans. Locals in countries with poor waste management systems are employed to collect washed-up plastic items from the shores to be turned into flake. This not only helps create sustainable jobs in those communities, but it also makes our Green Shields ocean-friendly.

You can learn more about the Prevented Ocean Plastic initiative at

www.staegerclear.co.uk/prevented-ocean-plastic

Each Green Shield set can be purchased directly from our website for only £9.99

Staeger Clear Packaging: a UK Business Hero

We are humbled and honoured to announce that Staeger Clear Packaging has been recognised as a UK Business Hero and has been awarded the UK Business Hero stamp.

The initiative has been widely supported by HRH The Countess of Wessex and the stamp has been designed to distinguish UK businesses who have gone the extra mile during the Coronavirus outbreak by supporting their Chamber and their local business communities.

We'd like to thank Coventry and Warwickshire Chamber of Commerce for the nomination, and for the support and partnership that has been constant and ongoing, especially in the past year.

We will continue to do the best that we can to support the local businesses and the NHS for the remainder of the pandemic by supplying green shields and face visors that are both medically graded and planet friendly!
